

Your IT interconnection provider

Ever had that sinking feeling when you open the server cabinet and the server turns off because the IEC Mains lead has fallen out of the back of the server! IECLOCK is the solution.

Why IECLOCK? –

Retrofit solution that suits any standard IEC inlet. Guards against accidental disconnection

Patented locking IEC connector -

The patented connector **cannot** be accidentally pulled or vibrated out of the inlet.

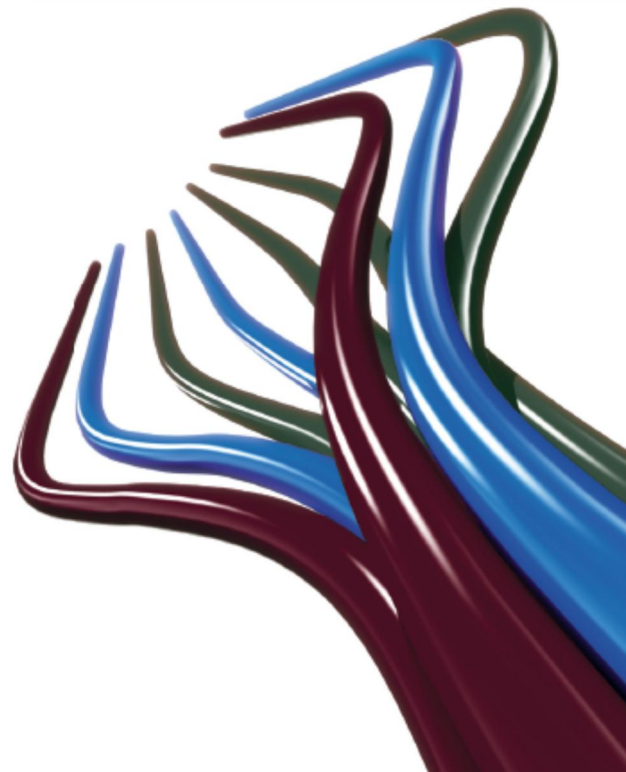

If you are interested in this product then please contact us for a demonstration.

Applications -

Suitable for use with 'any standard' C14 or C20 inlet. Protects devices such as Servers/Switches/PC's/UPS/CCTV that are vulnerable to vibration and accidental disconnection.

INTERCONNECTION - it's what we **KNOW**, it's what we **DO** and it's what we **SPECIALISE** in!

Let's get **INTERCONNECTED**.
